

## ***I-GLIDE***

***i-GLIDE*** is anti hook sway technology ideally suited to both standard and custom applications

***i-GLIDE*** was developed in Australia by **JDN MONOCRANE** and represents world leading crane performance & Safety

***i-GLIDE*** has been tried and tested in a multitude of industries with outstanding results

Key feature of ***i-GLIDE*** include:

- ☑ Intelligent electronic control system that allows the crane and load to accelerate and decelerate with the smoothest properties possible.
- ☑ Electronic control enables the crane and load to accelerate and decelerate at the same rate i-ndependent of load – i.e unloaded, partially loaded or fully loaded.
- ☑ This control minimizes potentially dangerous hook sway.
- ☑ Provides excellent lower speed control and inching properties.
- ☑ Provides 3 speed motion control of as standard
- ☑ Mid and Creep Speeds are able to be altered to suit clients requirements.

***i-GLIDE*** reduces the motor brakes to a parking brake only as most braking is performed electrically, dramatically increasing brake life – **BRAKE ENDURO™**

\*\* - Factory Default Set – Can Be Altered to Suit Customers Specific Requirements.
